ANGAD SINGH

Singa401@mcmaster.ca I 647-964-3458 I https://www.linkedin.com/in/angad-singh I https://github.com/angxd1

SUMMARY OF TECHNICAL SKILLS

Programming Languages: Python, C, Java, JavaScript, SQL, HTML/CSS
Frameworks & Tools: Streamlit, Pandas, NumPy, Matplotlib, SQLite
APIs & Platforms: OpenAI, Git, GitHub, VS Code

EXPERIENCE

Cloud Engineering Core Team Member Nov *2025 – Present*
AWS Cloud Club (McMaster University) *Hamilton, ON*

- Selected as a core team member to help build and scale a student cloud computing community focused on real-world technical skill development
- Collaborating with a cross-functional leadership team to design and deliver hands-on workshops, technical talks, cloud labs, and project nights
- Supporting the planning and execution of cloud challenges and applied learning events (e.g., AWS Jam, certification prep, project showcases)
- Contributing to the development of student-led, cloud-powered projects using industry tools and collaborative workflows (GitHub, Slack, Notion)
- Helping grow engagement and participation by building initiatives that connect students to practical cloud engineering and software development experiences

Mathematics Tutor *Sep 2024 – Feb 2025*
Garth Webb Secondary School *Oakville, ON*

- Provided personalized tutoring for students in grades 9-12 to enhance mathematical understanding and proficiency
- Improved grades by 15-20% for multiple students by fostering a supportive learning environment

Found & Operator *June 2023 – June 2025*
Entrepreneurial Startup Barber Business *Oakville*

- Founded and operate an entrepreneurial, client-based service business delivering professional grooming services to a recurring customer base
- Built and managed end-to-end business operations including scheduling systems, client communication workflows, service quality control, and customer retention strategies
- Demonstrated strong ownership, accountability, and real-world entrepreneurial problem solving in a self-directed operating environment

PROJECTS

Smart Data Analyzer & Data Intelligence Platform | Python, Streamlit, Pandas, SQLite

- Built a full-stack analytics system that ingests datasets, applies automated cleaning pipelines, and validates schema structure before analysis
- Designed and implemented a dataset validation engine to detect identifier-like columns, constant features, high-cardinality categoricals, datetime fields, and distribution anomalies
- Developed a quantitative data-quality scoring system (0–100) using penalty-based diagnostics for missing values, duplicates, structural issues, and outliers
- Engineered a modular backend architecture with a SQLite persistence layer to store dataset history, cleaned snapshots, and generated reports
- Created automated insight and reporting pipelines to surface risks, correlations, and structural warnings through an interactive dashboard

LEADERSHIP & EXTRACURRICULARS

DECA Club *Sept 2024 – June 2025*
Garth Webb Secondary School

- Led and mentored 30+ students in business problem solving, competitive case analysis, and presentation development
- Organized training sessions and mock competitions simulating real-world business scenarios
- Guided peers in **business problem-solving** and effective communication under competition deadlines

EDUCATION

McMaster University *Sept 2025 – Apr 2030 (Expected)*
Candidate for BASc, Computer Science *Hamilton ON, Canada*
